WHAT IS FACE READING?

“To examine a person, we must first examine his heart, to examine his heart, we must first examine his face” by Song dynasty’s Chan Pur, a famous Face-Reader.

Face and palm readings, as well as aura and vocal energies, are used to analyze and predict a person life’s destiny. Often requiring the rare ability to read subtle energy, these unique observational techniques are still practiced today. The ancient Chinese believed that a person’s face is inborn and will reflect his or her heart and thoughts. Much of the communication within our peers is nonverbal. Members understand the shared common body language but do not need language to communicate.

The generic approach tells us that human will inherit certain traits and attributes from parents or ancestors. Our height, weight, color of skin, eyes, and vocal to name a few are affected by genes and as a result certain patterns will emerge and the cycles of universe will repeat itself. Face reading tries to capture such patterns and predict the futures events that might occur in a person’s journey of life. For instance, when a person is born with thick eyebrow, more often than not such person’s parent also with thick eyebrow and the reverse is also true. Eyebrow like any other area of our face is closely related and affected by the functionality of our body parts and organs especially kidney. Person born with thick eyebrow is said to have strong kidney or in western words healthy and functional kidney. Person with thick eyebrow (will explain in details later) is rather active and aggressive and such person has higher sex drive than normal fine eyebrow person. Due to his adrenaline rush, such person is eager to satisfy his gratification with many partners other than his wife. As for female, due to the same reason, she might not have the patient for details and as such, she is rather weak in fine and details works.

A person who is constancy working outdoor with sunshine or cold weather will logically have rough skin as opposed to an office person that has higher chance of a smooth skin.

Western psychology has determined that our thought electrical wave is radiated through the upper skin of our body and reflected to our whole body parts and organs. Over time, such conditions will filter through and certain structures and patterns will emerge, as our cell memory is formed. Such structure will then be reflected by our face textures. With few thousand years of Chinese Statistically approaches of face reading, I am sure you will find such techniques amaze you.
