English Article on Chinese Metaphysic-9

Exclusively brought to you by Kerby Kuek

External Environmental that affect us?

Is a construction site in the vicinity?

Major health problems are caused by construction sites. Construction sites not only attract 'unkind energies' to the house, but the sound of drilling and demolitions, as well as dusty debris, are also bad for a person's health. Again, I would recommend the use of the 5-elements theory to counter the unkind energies.

Any nearby buildings with bad energy?

Old, deserted, too tall or too small buildings nearby will affect the inhabitants of the house. Old and deserted buildings will bring excessive yin energies to the house. Sharp-edged neighboring houses that directly face your door are also believed to bring in unkind energies.

Any big or dying trees nearby?

Too big of a tree will create excessive Yang energies because anything that is excessive in any dimension is considered to attract 'unkind' energies that disrupt otherwise 'kind' energies. What should you do with big trees? You need to handle them with care so as not to offend your local authorities. Trimming it is the best solution. What if the tree is dying? Dying trees are believed to radiate 'unkind' energies that might slow down a person's life progress. If you have not already purchased such a house, I would advise you not to as it would affect a person's well-being. In case you have already resided there for some time, you should place a cup of water facing such a tree if you cannot get rid of it. The water element is said to drain off the unkind energies radiated by dying trees. [E-mail address of Mr. Kerby Kuek : Kerby_kuek@yahoo.com.hk](mailto:Kerby_kuek@yahoo.com.hk)
