

Xuan Kong Zhang Pai School (玄空掌派)

Xuan Kong Zhang Pai School (玄空掌派) is formed by Grand Master Lau to promote and create awareness of traditional Chinese Metaphysic in a more contemporary or scientific means or methods. Master Kerby Kuek is proud to be his first disciple.

In ancient Chinese, traditional Feng Shui, martial arts, metaphysic and social arts were learned verbally and more often written texts were more of camouflage either to prevent the upset of the imperials (in those days exclusively for the rulers) or to prevent enemies from learning the crux of techniques. Therefore through times such arts and science were either lost or falsely passed down from generation to generation even until today, with or without realizing that they had falsely learned the arts!

Our School is to create the total awareness of traditional Chinese metaphysic and explain the universe in line with scientific and specific proven methodology by utilizing Chinese metaphysic tools. Believe it or not such tools also able to explain the Black Hole theory. Defying the superstitions and taboo on metaphysics especially on Feng Shui. Our aim is to point out the rational of metaphysic that is the basic of all metaphysic, *Bagua (Pakua)*, and the *formation of Bagua (Pakua)* is often neglected by modern practitioners. Bagua is also synonymous to I-Ching, which is popularized by Li Jin Fang (see his bio).
