Visit to Hong Far Leng and ancient Tombs

It is unwise to act like a real master when you are only half barrel full. Mind you ancient Master or scholar always do not write down their essence of techniques for two reasons, one, they often oral teach the essence to disciples and, they afraid that such techniques might be on the hand of the bad-hearted people. God knows the real essence, but that's always one way we can find out, **that's to study the ancient tombs done by prominent masters**. Such works cannot be camouflaged and have to be authentic. Their skills and their texts could have differences but only the works (tombs site) can be trusted. The core of the text is to narrow down the focus on the Xuan Kong techniques.

Site 1: The method or technique of burial is called 'Ant Tomb'; this abnormal technique is rare in the Southern part of China.

Different Angle of the 'Ant Tomb'

The frontier with water and Sha

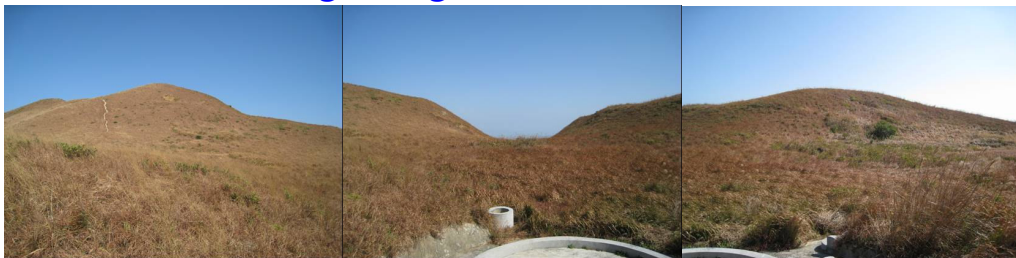

The right side is a wonderful Sha with layers of mountains embracing such site

The left side is also a beautiful sha with many layers embracing the site

Site 2: *An example that is not easy to find but nevertheless Xuan Kong Zhang Pai able to locate such site*

Another wonderful site that called 'Happy Fellow' (樂山)

A typical 'Happy Fellow' (樂山) is where the left side is descending; The middle is with another hilltop while the right side is ascending.

A typical example of a 'Luk Chuen' mountain near by

Site 3: The camel back Rear Support Site-ancient tomb

This tomb is unique with 'camel back' support from the rear

The left, right sides are embracing the site 'tight' and 'close'!

Example of 'camel back'

From the top of Hong Far Leng, we can see the dragon branching down and diverged

The structure of the mountaineer is absolutely amazing at the top of Hong Fa Leng, northern part of Hong Kong
