One should keep in mind this reading is relative to previous year unless otherwise stated.

On **relationship-related issues**, generally, is a good year for harnessing and sustaining relationships. It is also a year prone to vice activities related to relationships. Bad taste relationships by celebrities will be the headlines whole year long.

On **health-related issues**, especially related to stomach, skin as well as lower abdominals parts should keep clinics and hospital busy all year long.

Industries that will outshine the others are the **education, printing, garment, furniture and travel and logistics** industries. Be in the right industries to reap the abundances. Industries such as financial and commodities are rather weak for the whole year.

Southeast and East areas of your country will enjoy the growth this year, search around for opportunities there early and you might be able to enjoy the progress of this year's growth.

Avoid West and South areas that might create problems for your business.
