

with great power, comes great responsibility

I-Ching & The World of Metaphysics

Liu Fa-Part 6-Early Days Periodic Diagram-先天元運圖

The inner layer is the Early Days Bagua is meant for receiving 'water', while the outer layer transformed 24-mountians Gua is meant for harnessing 'mountain'. For instance, should the inner layer of Heaven Gua is Ham, which is in command in the upper period 1, with Rat, Goat, Rabbit ad Snake transformed as Ham Gua, in line as harnessing the upper period for mountain. Another example, say Heaven Gua is Lei, that is Lower Period commanding Gua, the Earth Gua Horse, Rooster, Ox, and Boar transformed as Lei to harness the mountain energy. This is the Yin and Yang, static and dynamic and inverted theory and principle.

In the Xuan Kong Fa Jian Cycle Periodic Diagram, 1-white, 2-black, 3-Jade belongs to the Upper period, 4-Navy Green, 6-white, 7-red as Middle period, while the 8-white and 9-purple as Lower period. This is different from the 3 cycles 9 periods time concept and also not the same as in the 2-Period Cycle (only upper and lower period) Heaven Period of 90 years and Earth Period of 90 years!

Early Days Cycle Periodic Cycle
