Mouth Chin

(Ages 61 to 71)

The chin represents a person's journey of life from age 61 to 71. A good chin will lead to good later or retirement years for a person. A good chin is defined as wide, protruding forward and having fullness in the neck area. Such a chin means having good children that are caring and with sufficient funds to enable one to retire with a good quality of life. This is also an **area of subordinates that work for you or your house cleaners.**

Round chin

This person is said to have strong family values and leadership skills. Such a person will gain trust and respect from kids and subordinates.

Sharp/pointy chin

This person is the analytical type, demanding yet creative, yet lacking the stamina or persistence to succeed. As opposed to a round chin, this person does not have strong

family values. Such a person is likely to be lonesome in their later years.

Square chin

Such a person is an action-type person that will not take 'no' for an answer. Such a person is active, love sports, and with such a chin is equipped with the stamina and persistence to succeed.

Square chin with bulging sideways jawbones

People with such jawbones are ruthless and ungrateful and will go all-out to get what they want. Such people are revengeful, vindictive, narrow-minded and selfish.
